Images

Take some photos of yourselves and objects that surround you. These images might describe your personalities and your relationship. These might be of your hands, your favourite chair, current jewellery or a view from your home. Don't worry about taking great photos.

You can post these back to us, or send us hi-res digital images, please include a few comments for each image, let us know why you took them.

Words

Write something about yourselves, where you met, why you are together, what you enjoy doing. It would be nice to hear from each of you, but you could write for each other. Think about details that stand out for you but often go unsaid. Again, there is no need to dress this up, the details and your perspective are already interesting. You can hand-write this, or type it up and send it in an email.

Rings

You might already have some ideas about the rings you want designed. This might be a form you could sketch, or an image you have seen elsewhere. If you already have something in mind, or a phrase that might be inscribed on the jewellery include this with the other responses
